AMERICAN ACCESS
CASUALTY COMPANY

Data Integrity Updates

Effective September 24, 2008 American Access is please to announce that we've implemented an update to our data integrity. This will provide the POS user with help in our application and endorsement entry fields and improve the quality of our customer data base. Below is a list of upgrades to our system. If you should have any questions please feel free to contact us.

1. **Data Verification – Some fields will be edited for more valid information. This will include confirming that the city and zip code correspond.**
2. **New Fields – These include a second Phone Number, E-mail Address, Business Use explanation, and Warranty Information. You will be required to check the box that the Customer agrees to the Warranty statement.**
3. **Required Fields – Some fields have been changed to become required fields. Most notably, you must choose an occupation from the drop-down list.**
4. **New and Revised Underwriting Edits**

Please note, if you are simply processing a quote, you will not be required to fill in all of the fields. However, once you decide to submit an application or an endorsement, the system will let you know which fields are required to be filled in or answered in order to continue the processing.
